本書は、平成18年度科学研究費補助金・基盤研究A（課題番号18252001、研究代表者：吉野諒三）の研究課題「環太平洋価値観国際比較調査－東アジア周辺諸国の「信頼感」の統計科学解析－」の一環として、2006年度に遂行された、環太平洋（アジア太平洋）価値観国際比較「USA調査2006」に関する第一次報告書である。

この研究は、歴史的には統計数理研究所における1953年以來の「日本人の国民性」調査及び1971年以來の「意識の国際比較」調査の延長上にある。「日本人の国民性」調査は、戦後民主主義の基盤としての官民の世論調査発展と緊密に結びつき、「意識の国際比較」調査は、連鎖的調査分析（Cultural Linkage Analysis, CLA）の確立へとつながった。そしてさらに、最近行われた我々の他の国際比較調査研究とともに、この研究は、計量的文明論としての「文化多様体解析（Cultural Manifold Analysis, CULMAN）」という方法論の確立を目指す、研究の一環としても位置づけられる。

本研究の背景と意義は、以下の通りである。

第二次世界大戦以降続いた冷戦が終了し、世界情勢のダイナミックな変動とともに、政治、経済、社会の伝統的枠組が大きく変わり、社会生活の基盤であった人々の信頼のあり方も大きな影響を受けている。伝統的な産業社会から高度情報化社会への遷移期でもある現在、従来の家庭、学校、職場での人間関係のあり方にも崩壊が生じ、新たな時代の流れが確立するまでの混乱が続いている。

一方、政治経済の視点からは、欧州共同体や南北アメリカ圏のみならず、東アジア圏の再編成が唱えられている。東南アジアを含む東アジア圏は、欧州とは異なり、多様な文化、歴史を背景に持つ国々や地域の集合であり、政治にせよ経済にせよ、それらの統合は必ずしも容易ではないであろうが、現実にはASEAN等の協力関係が推進されつつある。我々が前調査研究の申請時に、タイトルとして「東アジア」という言葉を用いた際には、この言葉はまだ一般には、地理的にあいまいなものでしかなかった。しかし、今日では「東アジア共同体」や「アジア・太平洋共同体」等々の国際協力の枠組みの検討が始まり、政治経済的に実体を持った言葉となっている。

かつてMax Weberは、「プロテスタンティズムと資本主義の精神」の関係を論じた中で、儒教の影響がある中国などのアジアの国々に対して、そこでの資本主義の順調な発達に否定的な見解をのべていた。しかし、日本は明治維新以降、そして戦後においても目覚ましい経済発展を見せてきた。その例外を説明するために、日本は儒学の影響はあったが、儒教が生活に入り込むことはなかったなどの議論がなされたこともあった。しかし、さらにその後のNICS、NIESなど台湾、韓国、東南アジアの国々の発展、そしてこの10年ほどの中国の目覚ましい発展は、特定の宗教や倫理と経済発展との関係を単純に図式化することは賢明ではないことを証明している。また、特に中国の過去数十年の急激な社会変化は、「社会体制と国民性（国民の意識構造）との相互関係」という社会学の主要テーマに対して、大きな示唆を与えるであろう。

こういった世界の流れを適格に把握し、将来を見通すための実証的基礎情報を収集すべ

く、各国、各機関が様々な社会調査、国際比較調査を遂行している。例えば、世界価値観調査（World Values Survey）は、世界の 20～30 数カ国で共通質問項目を用いた国際比較調査データや時系列比較可能なデータを提供し、学術研究にも行政施策にも資するところが大きい。しかしながら、例えば、過去の東アジア地域における調査の実情を詳細に調べてみると、その結果には疑いが隠せない。国際比較調査では、質問項目を各国の言語に適切に翻訳することが重要な手続きであるが、各国内の事情の差異を見過ごしたための誤訳が見受けられ、また、報告された回収率などから、計画された統計的無作為標本抽出の手続きが調査の現場でどこまで遵守されているのか、疑義を持つ調査研究者も少なくない。

以上のような背景があり、我々は、アジア・太平洋の調査においては、やはり当該地域の人々によって慎重に推進されるべきであるという認識に至った。我々は、各国でどの程度統計学的に適正な標本抽出調査が遂行でき、また国際比較可能性が保てるのかという課題を自ら実証的に検討することを主眼にし、それを把握した上でアジア・太平洋諸国の人々の価値観や意識を比較分析する課題に取り組もうとしているのである。

今回の調査票は、一般社会意識調査としてのスタイルをとり、人々の生活一般に関する多様な項目を含めている。しかし、特に 21 世紀の変わり目の急変しつつある世界情勢、そしてその中でも、急速に変化する東アジア周辺の国々と、数々の問題を抱えながらも再秩序化されつつある国家間の関係を考慮して、日本と他の東アジア周辺諸国の人々の価値観、对人的信頼感や法意識を含む人間関係に関する意識、自然観や生命観の統計的解明に適切と思われる項目を検討して試行している。これらのテーマに関する項目は、一部、重複させながら、2004 年度に日本 0 4 A と日本 0 4 B の二つの調査票によって、調査が遂行された。重複部分は基本的な価値観や態度に関する項目であり、2 つの調査間での同項目に対する回答の安定性や、それぞれの調査内での人々の回答の多次元パターンを解析すること等が意図されていた。社会調査、特に国際比較調査では費用、時間、労力のみならず様々な技術的な限界が常に付き纏うものであり、目前の多様な問題解決へ直ちに繋がるような調査項目の選定は容易ではない。今後の各方面での調査データや情報を、相補的に考慮して研究を推進するのみである。

2004 年度の日本調査 0 4 A における調査質問票は、これまでの国際比較調査で用いられてきた項目やそれらを一部修正した項目を取り入れ、さらに当該調査のために作成した新項目などで構成されている。これは、われわれの東アジア価値観国際比較調査の第 1 ラウンド(2002-2005 年度)とでも呼ぶべき科学研究費補助金・基盤研究 A(2)「東アジア価値観国際比較…信頼感の統計科学的解析」の成果に基づき、その拡張としてのアジア・太平洋地域の比較調査にふさわしい意識一般の調査票となることを意図した。今回の USA2006 調査票は、この日本調査 0 4 A 調査票を国際比較のために、一部、USA 調査用として最小限の修正を施し、翻訳したものである。

詳細なデータ解析は、実際の調査では避けられない各国・各地域の言語の差異、調査方法の差異などを考慮し、単純に回答分布の皮相な数字の大小比較ではなく、今後収集され

ていく他の関連諸国・地域の調査データや資料、情報とともに、慎重に時間をかけて安定したパターン構造を浮かび上がらせるような分析がなされて行くべきである。それゆえ、本報告書が、国内外の多くの方々に速やかに情報を提供すべく、一次報告として刊行されている旨を御了解願いたい。

1. Introduction

This is a report on USA 2006 Survey as a part of “Asia & Pacific Value Survey” (2004-2007 fiscal year) by the cross-national survey team of the Institute of Statistical Mathematics (Chief: Ryozo Yoshino). We are developing this study in order to exemplify practical research of a new methodology for cross-national comparative survey, called CULMAN (Cultural Manifold Analysis) (See Yoshino [2005b]).

Some historical background of this study is as follows. (See Yoshino [2001, 2005c, 2006] and Yoshino & Hayashi [2001] for more detailed English explanation on the history, methodologies such as back-translation technique for questionnaire and statistical random sampling, a paradigm of cross-national comparability, etc. As for the information on our past surveys, see a series of ISM Research Reports published over decades or our home page of the Institute of Statistical mathematics. <http://www.ism.ac.jp/~yoshino/>)

2. Some History on Our National Character Survey

The Institute of Statistical Mathematics (ISM) has been conducting a longitudinal nationwide social survey on the Japanese national character every five years since 1953, using the same questionnaire items (Mizuno et al., 1992). The survey is called “Nihonjin no Kokuminsei Chosa” (Japanese National Character Survey). Although definition of the term “national character” may be very problematic, here it simply means the characteristic shown in people’s response patterns of the questionnaire survey (Hayashi et al., 1998; cf. Inkeles, 1997). The question items cover various aspects of people’s opinions about their culture and daily life. This survey was one of the foundations of the public opinion survey system based on the statistical sampling theory developed immediately at the post-World War II in Japan. The significance of this survey was clear at the time when Japan was expected to shift from the military regime to a democratic system in the latter half of 1940s (Yoshino, 1994). This survey stimulated many countries to carry out the same sort of time series surveys such as the World Value Survey, Eurobarometer, General Social Survey (GSS) of USA, ALLBUS of Germany, CREDOC of France, etc. (There was a time that the post-war Japanese

democracy had been criticized because it was not democratic from a viewpoint of western world. Interestingly, however, Japan conducts public-opinion polls based on a statistically ideal sampling using an almost complete residential or voters' list whereas the other countries have to use other methods such as quota sampling or random-route sampling. The latter two sampling methods consider statistical randomness but do not yield the statistical estimate of sampling errors. As far as the system of public-opinion polls is concerned, therefore, Japan may be more democratic than the western countries.)

Since 1971, the survey of ISM has been extended to a cross-national comparative study for more advanced understanding of Japanese national character (Hayashi, 1973). The focus of our cross-national surveys is the investigation of the statistical comparison of peoples' social values and their ways of thinking and feeling. More explicitly, our concern has been with cultural identities and people's attitudes toward economy, freedom of speech, interpersonal relationships, leadership, politics, public acceptance of science and technology, religion, social security, etc. These aspects may clarify certain similarities or dissimilarities that are represented by psychological distances between countries or races in certain statistical pattern analyses of responses (Hayashi, 2001a, 2001b; Hayashi et al., 1998; Yoshino, 1994, 2001c).

The cross-national survey, however, involves particular methodological problems. It is not simple to compare response data collected under different conditions. For different countries may use the same questionnaire but in different languages and employ different statistical sampling methods as well. There is no a priori knowledge as to how these different conditions influence peoples' responses even in the case where there is no substantive difference of opinions and social values between peoples (Yoshino, 2001c). Thus, an important problem of our study is to investigate those conditions under which meaningful *cross-national comparability* of social survey data is guaranteed. As our approach towards this problem over decades, we have been developing the methodology called CLA (cultural link analysis). The main components of CLA are 1) a spatial link for cross-national comparison, 2) a temporal link inherent in longitudinal analysis, and 3) an item-structure link inherent in the commonalties and the differences in item response patterns within and across different cultures (cf. Guttman, 1972). In CLA we utilize, for example, the back-translation technique and statistical pattern analyses such as Hayashi's Quantification Method (Hayashi, 1992) or Yoshino's (1992a, 1992b, 1994, 2001c) Super-culture Model. The utilization of those pattern analyses consists of an important part of our methodology. Namely, although a simple cross-national tabulation of people's responses with respect to a single item may not be reliable because people's responses may occasionally be sensitive to slight differences in the wording of certain questions, certain pattern analyses or scaling on a set of items can be reliable. (See Yoshino & Hayashi [2002] for overviews on our approach.)

On the other hand, in this cross-national study, we have found some response tendencies particular to certain countries. For example, the Japanese tend to avoid polar answer categories and to choose intermediate categories, whereas the French generally tend to give negative responses to any question. (Here I may be exaggerating these tendencies to make the points clearer.) I think that we should consider these response tendencies when we analyze not only people's sense of trust but public opinion polls or social survey data in general.

See Hayashi (2001a, 2001b), Hayashi et al. (1998), Yoshino (1994, 2001c, 2002, 2005, 2006) and Yoshino & Hayashi (2002) for results of our cross-national surveys.

3. Japanese national character survey (1953-present)

Our longitudinal survey of Japanese national character shows some stable aspects of attitudes and social values of the Japanese (Hayashi & Kuroda, 1997; Yoshino, 1994). Among others, the stability of interpersonal attitudes and religious attitudes may distinguish the Japanese from other countries. Namely, the Japanese show a higher score on the "Giri-Ninjo scale" than the other countries. Moreover, one third of the Japanese have religious faith, but more than 60% of the Japanese support the opinion that religious attitudes are important (Yoshino & Hayashi, 2002; Yamaoka, 2000).

I will briefly explain certain fundamental dimensions of the Japanese social values as follows.

Fundamental dimensions of the Japanese social values

Hayashi (1993) has identified two important dimensions that underlie the Japanese national character in the survey. That is, 1) the dimension of interpersonal relationships ("Giri-Ninjo" attitude, or a complicated sense of humanity and obligation that is particular to the Japanese interpersonal relationships) and 2) the dimension of a modern-traditional contrast in their way of thinking. On one hand, as mentioned before, the Japanese interpersonal attitude has been stable, at least over the last half century, and probably much longer than our longitudinal survey. This corresponds to the first dimension. On the other hand, for over 100 years since the Meiji Restoration in 1868, Japan has been doing her best to overtake western science and technology and to develop it into a Japanese adaptation. Probably this enduring effort has underlined the dimension of the Japanese traditional vis-à-vis a modern orientation in the Japanese way of thinking.

However, the Japanese way of thinking has been gradually changing, and there appeared a generation gap between people of 20-24 years old and those older than 25 years in our survey of 1978 (note that the younger generation as born more than 10 years after the end of World War II. In 1956, an economic white paper declared, "Japan is no longer in the post-war condition," and this symbolized the start of the high-speed development of industry and economy. On the other hand, however, Japan had to face many social problems concerning pollution because of the high-speed industrialization around 1970. Since the signs of the younger generation's changes appeared as early as 1978, their current way of thinking has become more complicated than ever.

Furthermore, the Japanese are presently in the confusion of the transition period from the established social system to a system of a highly advanced information age. In this confusion, a recent survey reports the majority of Japanese people's distrust toward traditional systems such as banking, bureaucracy, as well as of congressmen, police, etc. (Central Research Services, Inc., 2000), in spite of the stereotype of the Japanese as a highly trustful nation (Fukuyama, 1995).

4. The World as a Cultural Manifold

The 20th century was the time of expansion of western civilization. Differences of cultures occasionally prevented us from our understanding each other. In this time of globalization, I would like to emphasize the fact that there are various ways of successful social development; therefore, we should not impose one's own social value on any other country if we intend to develop a peaceful world.

The globalization necessarily changes some institutional systems and customs towards more universal ones under the influences of transnational exchange or trade. On the other hand, some other systems are becoming more and more sensitive to cultural differences, as a reaction to the globalization.

In order to facilitate the mutual understanding between the East and the West, we need to keep in mind the differences of social values between them. The study on the scale of trust (Yoshino, 2005, 2006) may caution us on the applicability of a certain "single" scale invented by the Western cultures to the Eastern cultures, or vice versa. For example, it is not always the case in the Asia that "the distrust is a culture of the poverty" as Banfield (1958) once mentioned. A Chinese proverb says that "Fine manners need a full stomach" (or "The belly has no ears"), but another says "Be contented with honest poverty." Gallup (1977, p.461) reported that they could not find a very poor but still happy people in their global survey. I think that they missed the reality. For example, Brazilians were very optimistic even when Brazil fell down to the worst debtor nation in the world (Inkeles, 1997). Inglehart reported a correlation of .57 between economic development and life satisfaction for some 20 countries surveyed in 1980s (Inkeles, 1997, p. 366-371). But the life satisfaction of Japan in the 1980's was lower than around 2000, although Japan was close to the top of the world economy in those days and now she has been suffering from depression over years until recently. Thus, we need scales constructed from various perspectives or social values in order to understand various cultures in the age of globalization.

Although China had so many battles between small countries (within the area corresponding to the modern China) over thousands years in their history, once they were synthesized as a large empire, their government employed peoples of various races as high-class bureaucrats. This made them possible to develop and maintain a large empire and their culture, often over centuries. This is analogous to the Roman Empire, but it is contrastive to the modern western countries (and Japan during WWII) that colonized Asian and African countries in the 19th and 20th centuries. The history shows that trust between different races changes according to social conditions in the long run, although it is relatively stable over time.

After our previous China survey (China 2001 survey [Yoshino, 2006]), there

occurred the problem of SARS propagating from Guang-Zhou in China. People inside and outside China criticized the local governments, suspecting that they attempted to hide the serious conditions. This seems to suggest a significant change of China, from secretive attitude to more open attitude for every matter. The secretive attitude was linked to the system of severe punishment on political responsibility. The open attitude is a key to democracy that is necessary for successful capitalism. The mayor of Beijing got fired because of his ill treatment with SARS. The government started encouraging people to inform of the presence of the patients. This situation seems to show that China is changing rapidly, but in a Chinese way. Here it may be important to quote Dogan (2000)'s statement "... Erosion of confidence is first of all a sign of political maturity. It is not so much that democracy has deteriorated, but rather the critical spirit of most citizens has improved..."

In spite of prevailing confusion in the East Asia (actually in the entire world), I hope that the East Asia will advance towards the peaceful development without serious conflicts. For the mutual understanding with Asian countries, one should keep in mind their ways of thinking such as "Mentsu (face)" and "Honne and Tatemaie (real intension and principle)" of the Chinese, the Japanese, and the Korean. This is also the case with the Asian countries for the understanding of the west.

Once upon a time, Weber (1904-05) argued that Asian countries were not able to develop capitalism in his theory on religion and capitalism. Now we know so many counter-examples such as Japan, Korea, NIES, and China, against his argument. Some people argued that the Japanese adaptation of Confucius philosophy adapted to Japan functioned as a replacement of Protestant ethics and lead Japan to a successful development of capitalism (Morishima, 1984). But the past decades have seen many examples to show that economic success is not linked to a particular religion. Now we have more and more data to consider the relationships between economic development, social systems and social values because of the rapid change of social systems in many countries over the world than before.

I hope that our survey data will be helpful for the further constructive arguments and the mutual understanding for the peaceful development of Asia.

- 1) 今回の科学研究費の交付希望期間内には、以下の a)、 b)、 c) に重点をおいて研究を遂行する。

2) 研究の背景(特色、予想される結果と意義)

統計数理研究所では、1953年以來、「日本人の国民性」に関する意識調査を継続してきた。これは、戦後導入された標本抽出理論の実践的応用の確立を目指すものであり、また戦後の民主主義の発展を目的とした官民の調査機関による世論調査発展の基盤の一つとなった。これに関連して多くの実験調査や様々な統計分析法の研究が生まれ、統計学における実証的データ解析の発展にも刺激を与えてきた(水野他, 1992)。これは日本の独創であり、世界的にも海外の研究者達が例えば「一般社会調査(米国 GSS)」、「世界価値観調査」(Inglehart ら)、Eurobarometer (EU 委員会) など様々な調査を遂行するようになる契機を与えたのであった(吉野, 2003)。

この研究は、国民性をより深い観点から考察する目的で、1971年頃より海外の日系人調査を初めとして、「意識の国際比較調査」へと拡張されてきた(林他, 1998)。調査された国・地域のいくつかは言語や文化を共有しているために全体として比較研究の興味深い対象となり、「連鎖的比較の調査研究(Cultural Link Analysis)」と呼ばれる方法論が発展し、蓄積されてきたデータは世界的にも貴重な資料として認められている。これは統計学としては、「データの科学」という新たな実践的パラダイムの展開へ結びついている(林, 2001; 吉野, 2001)。

21世紀初頭の今日、世界秩序の再構成が進み、より大きな単位によって構成された国際社会が生まれつつある。この国際的潮流は、広義の民主主義の拡大として特徴づけられるであろうが、その成功には国家間、民族間の円滑な相互理解が重要である。しかし、現実には異なる文明圏の間での紛争が絶えず、今日の世界的武力緊張に至っている。各々の民族は長い歴史の中でそれぞれに必要な生活習慣、倫理、宗教、人間関係等、民族固有の文化を発展させてきた。この意味での文化が各国固有の政治・経済の基盤にある。各国の文化や国民性を各国が相互に深く理解することが、世界の平和的な政治・経済の発展を促進させる鍵となっている。

一方で、各国内部でも伝統的な社会システムが崩壊しつつあり、職場、家庭、教育現場における人間関係にも大きな変化が見られ、学級崩壊、家庭の崩壊、政治不信など、「信の崩壊」の時代となっている。しかし新たな社会の確立とともに新たな時代の信頼感が確立されるのであろう。そのための基礎情報として、現在の国内外の状況を適確に把握する必要がある。

日本は高齢化社会の中で労働人口が減少し、種々の社会問題を抱え、今日の世界経済での地位を保ち続けるのは困難となると予想されている。このために特に近隣諸国からの外国人労働者の積極的受け入れを始めとして、国際交流がますます必然となろうが、これに伴い、日常生活の中でも異文化間摩擦が様々な形で現われて来る懸念がある。この状況を生産的な形へ方向転換するために、異文化間理解、文化変容の研究がますます重要となってくる。この意味で、本研究で統計科学的に適正に

上記の1)、2)では、文化の「連鎖的比較方法論CLA」を開発し、3)では日米の比較研究の中で国際的かつ学際的研究テーマについてCLAの実践的検討を行い、その有効性を確認した。5)は特定のテーマに焦点を当てた国内での実践的応用を示し、さらに6)及び7)では海外の日系人に焦点を当て、既存の「日本人の国民性調査」の時系列的データと「意識の国際比較調査データ」との関連の中で、「文化の伝播変容」に関して時間・空間的变化を追求した。この中で、日本人や日系人固有の対人関係(義理人情)や宗教意識(信心を持たない人々も「宗教的態度が大切」と考えている等)、回答傾向(極端な回答を避ける等)が計量的に明瞭になってきた。8)はCLAを東アジア圏に適用し、東アジアの人々の意識構造を探った。

広範にわたる調査結果や分析の詳細を、取えて国際比較研究の統計学的方法論に限って要点を述べれば、次の3点にまとめられる。即ち、1) 各国や各地域では、異なる標本抽出調査が用いられており、単純な回答数値の比較のみで議論するのは危険であること。2) 同一言語でも微妙な表現の差異で回答分布に10~15%程度の差異を生み出すこともあること(バックトランスレーションによる検討)。3) このような問題点があるが、単一質問項目ではなく、複数の項目群に統計的尺度構成や多次元パターン解析を用いれば、各国の特徴を安定したパターンとして浮かび上がらせることができるのを確認した。我々はこれを、ノイズのある現実的データから、信頼性の高い情報を引き出す探索的データ解析の方法論と位置づけ、「データの科学」と称するに至った。これらの成果はその都度、統計数理研究所研究所レポート等として発刊され、国内外に広く配布され、また関連する近年の国内外での主要な出版物の一部は本申請書の研究目的の参考文献欄や、後述の業績表に記されている。

2. USA2006 年調査の概要

2-1 調査計画の概要

本調査は、平成18年度科学研究費補助金・基盤研究A（研究代表者、吉野諒三）の研究課題「環太平洋価値観国際比較調査－東アジア周辺諸国の「信頼感」の統計科学解析－」の一環として、2006年度に、米国全土に在住している米国籍の成人を母集団し、性別・年齢層別（10歳刻み）および人種別の割り当て法（クォータ法）に基づいて、個別面接聴取法による標本調査を行ったものである。標本抽出と実査については、(財)新情報センターを通じて、Kane, Parsons & Associates Inc.社(New York)に委託した。

ただし、今回の「割り当て」は、指定した3属性の3重クロス表を考慮したものではなく、それらの属性を各個別に、米国全体での国勢調査データの人口分布に合うよう調整し、調査が進められたという経緯が事後に明らかになった。したがって、個別の属性としては人口分布に沿っているとしても、それらのクロス集計では母集団に整合しているとは限らない可能性がある。

同時期に行った韓国2006年調査では、人種別を考慮する必要はなく、性別・年齢層別に関してだけの割り当て法であったため、性別は概略として各地点で1対1と考え、年齢層別だけの分布に配慮すればよかった。韓国での一般的な調査の場合、事後に国勢調査データと対照し、ウェイト付けで全体の分布を補正するらしい。われわれは、この種の補正が想定外の要因の交互作用を生み、予期せぬバイアスを導入すると危惧するため、ウェイト付け補正を避けることが多い。また、韓国2006年調査では、各地点での標本抽出はランダムウォークで遂行されていたが、USA2006年調査の場合は、必ずしもそうではなかったようである。

データ解析は、以上の点に留意して進める必要がある。

Kane, Parsons & Associates Inc.社から報告された調査の概要は以下の通りである。

(1) 調査内容

一般意識調査項目：52項目、基本属性質問項目：7項目、回答パネル：36項目
(調査票は当研究所が設計したものを現地調査者が必要部数を印刷製本)

(2) 調査対象母集団

(3) 調査地点数

90地点（アメリカ合衆国内から現地調査者が無作為抽出法によって算出した）

(4) 計画標本

資料1. Kane, Parsons & Associates Inc. 社による標本抽出計画

USA (Kane , Parsons & Associates, Inc.)

The country is stratified into nine sub-regions as defined by the U.S. Bureau of the Census: New England, Middle Atlantic, East North Central, West North Central, South Atlantic, East South Central, West South Central, Mountain and Pacific.

A quota is determined for each region according to the distribution of the population you wish to survey (aged 18 and over).

A total of 100 sample points will be used. Sample points are distributed according to the size of the community and whether the area is an urbanized area an urban fringe area, or outside an urbanized area, as follows:

Urbanized Areas

Central City

1. 500,000+
2. 100,000-500,000
3. Less than 100,000

Urban Fringe

4. 50,000+
5. 25,000-50,000
6. 10,000-25,000
7. Less than 10,000

Non-urban Area

8. Rural
9. Other

Within each sample point, interviewers will be given quotas of completed interviews, usually 9-10 interviews per sample point. Respondents must meet quotas based on 1) sex (male vs. female, in accordance with the age appropriate population), 2) age categories within sex, and 3) race/ethnicity.

SENSE OF VALUES INTERVIEWER INSTRUCTIONS

Introduction

This is a multinational study of persons who are aged 18+ in the U.S., Japan and Korea. The questioning format is similar to those of earlier studies. As you can see, the focus of the study is on important issues that relate to personal values.

Our firm will not be analyzing the findings, but will be sending the data to Tokyo to be analyzed by the Japanese researchers. As a result, we are very concerned that the data we send to Tokyo be only of the highest quality. This means that we reserve the right not to accept any completed questionnaire containing errors that cannot be corrected in our office by simple editing techniques. Especially relevant here are items that should have been asked but were omitted and failing to note that a respondent refused or was unable to answer a question. Every questionnaire submitted to us will be edited in its entirety to determine if there are any reasons that it cannot be accepted. Be sure to record multiple answers when required and try to limit responses to single answers when instructed to do so.

Sampling and Locating Eligible Respondents

All persons aged 18+ are eligible for this study provided they are capable of responding to the questionnaire, but your assignment notes specific quotas for gender, age and race.

Your sampling unit is recorded on your interviewer report form. You have been assigned a specific locational starting point with a city type and size in your geographic region. This information is also noted on the report form. It is important that you keep track of every attempted interview as well as those actually completed, based on your assigned quotas. The report form must document all of your activities and will be returned to our client in Japan. Failure to submit a completed report form may result in non-acceptance of your interviews.

Since show cards are used in the interview, all interviews must be conducted in person. Respondents will live in residential dwelling units (house, apartment, furnished room, etc.).

Schedule

You are to start interviewing immediately upon receipt of these materials.

Detailed Questionnaire Instructions

Please check each questionnaire to make sure that it is complete.

The questionnaire is straightforward and not difficult; you should have no problem in administering it correctly, but be sure to observe the skip patterns. Although in one or two places they may seem complicated, they are logical and make sense in terms of the questionnaire content.

Insert your name at the top of page 1 of each questionnaire. Leave the box at the top of the questionnaire blank. You should also fill in the information about the respondent on the last page. **WE WILL BE VALIDATING YOUR INTERVIEWS, SO RESPONDENT NAMES AND PHONE NUMBERS ARE NECESSARY.** Sign your name at the end of the questionnaire and insert the date of the interview.

Most questions contain a "don't know/refused" option. If you get such an answer for a question without such an option, note this in the margin rather than leaving the item blank (in which case we would assume you erroneously failed to ask the question).

The study uses 36 show cards, 1 through 36. They simplify the interview, but be alert to possible reading problems (resulting either from poor vision or illiteracy) and render whatever assistance is necessary if this occurs.

Do not read "Other" or "Don't know" responses, but be sure to record "other" responses in the precise words of the respondent.
